Straw & Hay Bale Nonwoven Weather Protection Cover

Engineered for **Reliable Weather Protection**

Straw & Hay Bale Nonwoven Weather Protection Cover

Essential Protection for Straw & Hay Bales

Thrace Group's Straw & Hay Bale Nonwoven covers provide vital defense against harsh weather conditions, shielding bales from rain, wind, and harmful UV rays.

They prevent fiber degradation and nutrient loss, while their breathable design reduces moisture buildup—minimizing the risk of mold and ensuring optimal storage conditions.

Straw & Hay Bale Nonwoven Weather Protection Cover

Water-repellent Surface

Treated to resist water penetration on the surface.

Breathable Design

Allows air to circulate, aiding moisture removal.

Reinforced Thickness

Engineered with optimal thickness to resist tearing, puncturing, and fraying, providing reliable protection against harsh weather.

Straw & Hay Bale Nonwoven Weather Protection Cover

UV Protection

Shield hay bales from harmful UV rays, preserving nutritional content.

Lightweight and Easy Handling

Easy to install, saves time and effort during covering/uncovering.

Custom Fit

Tailored to specific dimensions, provides optimal coverage and minimizes exposure.

Reusable & Cost-effective

Durable materials allow for multiple uses, cost-effective compared to disposable films.
